Usually the sip lids accompany the paper cups for hot drinks, because the drink is consumed directly without removing the lid, while the cross and dome lids company the paper or plastic cups for cold drinks, as the drink is consumed with a straw. In some cases, a sip lid can be used for cold drinks (the straw is inserted through the hole of the lid). Plastic round stoppers are used in dome lids to prevent the drink from leaking. Moreover, transparent lids with button can be used both for cold drinks with a straw and for hot beverages as sip lids.
